- ⇒ Splash Proof Casing
- ⇒ Micro Computer Temp. Sensor with Surge Protector
- ⇒ Digital Temp. Select 33°C to 45°C
- ⇒ Safety Thermal Cut-Out
- ⇒ Auto Flow Sensor Switch
- ⇒ 25 dia x 508mm Alum Slider Bar set with Soap Tray
- ⇒ Click Select 5 Luxurious Massager Spray Hand Shower
- ⇒ PVC Hose 1.52m x 1/2" BSP Connectors
- ⇒ 1/4" Soft-Turn Numeric Valve
- ⇒ FCF (Flow Control Filter) Valve

● Innovation Specialist in Instant Hot Showers

Joven is a renowned household name in quality instant water heater. We have been specialising in the development, design and manufacturing of a wide range of instant hot shower systems for domestic use since 1983. Reliability, high safety standards and continuous innovation are hallmarks of Joven, the leading brand in Southeast Asia today.

PERFORMANCE

● Micro Computer Temperature Sensor

The micro-computer is preprogrammed for temperature setting from 33°C to 45°C to make the showering more practical. At OFF the shower is at inlet water temperature. The heater switches ON by the rotation of the control knob clockwise from temperature setting 33°C to 45°C, the higher the setting the hotter is your shower.

This innovative memory logic enables the shower to maintain at your pre-selected temperature even when the shower is turned on and off, or even when the water pressure fluctuates.

● Electronic Power Control

This innovative electronic power control together with the increasing arrow from OFF and numbers 1 to 8 makes showering more practical.

At OFF the shower is at inlet water temperature. The heater switches on by rotation of the control knob clockwise from number 1 to 8, the higher the number the hotter is your shower.

The stepless electronic power control enables you to select to your ideal shower temperature - not too cold and not too hot. Thus, no energy wastage.

SAFETY FEATURES

● Flow Control and Filter (FCF) Valve

Designed to control the water volume in high and low water pressure areas and has a built-in filter cup to trap dirt particles entering the heater tank and clogging the hand shower spray. Ensuring lower maintenance to your shower unit.

● 1/4 Soft-Turn Numeric Valve

Turning the shower on and off is made much easier with our Joven unique 1/4 Soft-Turn Numeric Valve. The numeric indicator (1 to 8) provides an easy setting for the correct water volume and shower temperature everytime.

● Built-In Earth Leakage Circuit Breaker (ELCB) (Models MC350 and PC850 Only)

This extra safe built-in ELCB with 15 mA sensitivity will cut off the electrical supply to the heater in the event of current leakage from the heater. Thus preventing the user from fatal electrical shock.

● Safety Thermal Cut-out

The Safety Thermal Cut-out acts as a back-up to safety flow sensor switch to prevent the heater from overheating. Thus, the double safety system eliminates the danger of scalding to user.

● Safety Flow Sensor Switch

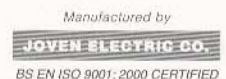

This is an automatic switch that ensures the heater only operates when there's sufficient water flow. Unlike conventional heaters, Joven's functional Flow Sensor Switch automatically cuts off the usage of the water heater when the water outlet is jammed. This avoids any sudden burst of hot water that will lead to the danger of scalding.

TESTED AND APPROVED QUALITY

Every model of Joven instant water heater are manufactured using high quality materials and stringent quality control to comply with the safety standards set by PSB Corp. (Singapore) and SIRIM (Malaysia).
